Least Common Denominator - Math is Fun

<https://www.mathsisfun.com/least-common-denominator>

That is all fine, but 18 is a lot of slices ... can we do it with fewer slices? Here is how to find out: Now find the smallest number that is the same: The answer is 6, and that is the **Least Common Denominator**. So let us try using it! We want both fractions to have 6 slices: 1. When we multiply top and bottom of $1/3$ by 2 we get $2/6$... [See more](#)

Fractions Fractions are the numbers between two integers written in the form of $\frac{p}{q}$. We express these numbers in the form of a quotient or fraction of two integers. In a fraction, the "p" is the numerator and "q" is the denominator. The value of "q" must be a non-zero integer. For a unit fraction, "p" is always equal to "1". To understand ...
